

Scott Renney

Final-year Software Engineering student at Swansea University focused on Java, Spring Boot and full-stack development. Experienced developing REST APIs, database-backed applications and Java software, alongside working as a university Teaching Assistant supporting students with programming and debugging. Motivated, adaptable, and eager to contribute to real-world software projects while continuing to grow technically.

EDUCATION

SOFTWARE ENGINEERING (BACHELOR'S DEGREE)

SWANSEA UNIVERSITY

June 2023 - 2027

NOTABLE GRADES/MODULES

- Concurrency – 97%
- Web service development – 87%
- Software engineering – 80%
- Algorithms – 80%
- Introduction to data science – 71%
- Database systems – 64%

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Kotlin, SQL, Haskell, Prolog

Frameworks: Spring Boot, Spring Framework, JavaFX

Web: REST APIs, HTTP, JSON

Databases: MySQL, PostgreSQL, relational database design

Software Engineering: OOP, testing, debugging, documentation

Tools: Git, IntelliJ IDEA, Linux, Docker

PROJECTS

Full-Stack Portfolio & Blog — Java, Spring Boot, Next.js

- Developed a full-stack portfolio and blogging platform using a Spring Boot REST API and Next.js frontend.
- Designed backend endpoints and integrated persistent storage for site and blog content.

JavaFX Team Game — Java, JavaFX

- Developed a desktop game as part of a semester-long team software engineering project.
- Implemented features including game logic, pathfinding and save/load functionality while working collaboratively with Git.

Dissertation — Interactive Timeline Tool

- Developing a tool for transforming structured data into clear, interactive timelines.
- Focused on presenting complex chronological information in an accessible visual format.

Top-Down Game — Rust, Bevy

- Developing a top-down game in Rust using the Bevy game engine to improve practical experience with Rust and entity-component systems.

EXPERIENCE

TEACHING ASSISTANT

Swansea University

- Support students in understanding core software engineering concepts.
- Diagnose programming errors and help students reason through debugging problems.
- Explain programming concepts and software design principles in an accessible way.
- Reinforce best practices in coding, testing, and documentation.

CARE ASSISTANT

- Worked effectively within multidisciplinary teams in high-responsibility environments.
- Managed competing priorities while maintaining accurate documentation.
- Developed strong communication, problem-solving and interpersonal skills.

BARCHESTER HEALTHCARE

July 2023 – Present

CARE HOME ASSISTANT

MILKWOOD CARE LTD

JUNE 2021 - JULY 2023

DOMICILIARY CARE WORKER

ABACARE

July 2018 - June 2021
